 - Software testing

PROFILE

As a committed IT student with a solid foundation in computer science, I excel in developing web and software applications, managing databases, and working with languages like Java, Python.. My passion for technology drives me to continuously learn and innovate.

PROJECT

Census Connect

July-2024/Dec-2024

The Indian census, conducted once a decade, is a manual process that collects vital demographic data. Our project aims to revolutionize this process by developing an online platform for households to update their information annually. This digital platform will enable real-time data collection. ensuring accuracy and efficiency

- Html
- Css
- Php
- Javascript

Smart Transpo Connect

Jan-2025/On Going

The Digital Portal for Transport-related Services solves these by automating tasks like vehicle registration, driving license renewal, traffic fine payments, and more. This system makes everything faster, more accurate, and better coordinated for users, authorities, and service providers.
